

Screening Statement on the determination of the need for a Strategic Environmental Assessment (SEA) in accordance with the Environmental Assessment of Plans and Programmes Regulations 2004 and European Directive 2001/42/EC for the Ardington and Lockinge Neighbourhood Development Plan

4 DECEMBER 2025

SUMMARY

Following consultation with statutory bodies, Vale of White Horse District Council (the 'Council') determines that the Ardington and Lockinge Neighbourhood Development Plan (NDP) does not require a Strategic Environmental Assessment (SEA).

INTRODUCTION

1. An initial screening opinion was used to determine whether or not the contents of the emerging Ardington and Lockinge Neighbourhood Development Plan (NDP) requires a Strategic Environmental Assessment (SEA) in accordance with the European Directive 2011/42/EC (the Directive) and associated Environmental Assessment of Plans and Programmes Regulations 2004 (the Regulations).
2. Any land use plan or programme 'which sets the framework for future development consent of projects' must be screened according to a set of criteria from Annex II of the Directive and Schedule 1 of the Regulations. These criteria include exceptions for plans 'which determine the use of a small area at local level' or which only propose 'minor modifications to a plan', if it is determined that the plan is unlikely to have significant environmental effects.
3. This initial screening opinion was subject to consultation with Historic England, the Environment Agency, Natural England and Oxfordshire County Council. The results of the screening process are detailed in this Screening Statement.

THE SCREENING PROCESS

4. Using the criteria set out in Annex II of the Directive and Schedule 1 of the Regulations, a Screening Opinion determines whether a plan or programme is likely to have significant environmental effects.
5. The extract from 'A Practical Guide to the Strategic Environmental Assessment Directive' in Appendix 1 provides a flow diagram to demonstrate the SEA screening process.
6. Table 1 in Appendix 1 sets out the criteria from the Practical Guide, along with an assessment of the Ardington and Lockinge NDP against each criterion to ascertain whether a SEA is required.

7. Also part of the screening process is the Habitats Regulations Assessment Screening, which can be found in Appendix 2, and the assessment of likely significance effects on the environment, which can be found in Appendix 3.
8. These two assessments feed into Table 1 and the SEA screening opinion.

THE ARDINGTON AND LOCKINGE NEIGHBOURHOOD DEVELOPMENT PLAN

9. The Ardington and Lockinge NDP will contain the following objectives and policies:

Objectives

1. To ensure that new housing development reflects genuine local need, makes use of small infill sites and progressively enhances sustainability while complying with the constituent features that make the Parish a distinctive, attractive and desirable place to live and work.
2. To protect and enhance the existing physical features and community services provided within the Parish and to enable new ones to be generated to maintain the social, economic and environmental well-being of the Parish.
3. To respect existing heritage designations and the North Wessex Downs Natural Landscape by having regard to existing national policies aimed at their protection
4. To maintain the natural environment of the Parish and to encourage the creation of opportunities for enhancing it.
5. To create a safe, convenient and attractive environment for non-vehicular modes of transport within the Parish by promoting improvement to the existing network of cycling and walking routes.
6. To be aware of increasing pressures from outside the Parish to accommodate recreational needs and to address them alongside policies set out in the Neighbourhood Plan.
7. To ensure adequate levels of off-road parking provision and access to open spaces in the Parish, while being mindful of Objective 6, and to seek to improve the quality of life of the community by reducing pollution, preserving dark skies and minimising the risk of flooding.
8. To evaluate the desirability of increased investment in the business community located in the Parish and to attune the Neighbourhood Plan to any future economic development deemed desirable.

Policies

Policy AL1: Separation of Settlements
Policy AL2: Built-Up Area of Ardington
Policy AL3: Outside the Built-Up Area of Ardington
Policy AL4: Resources and Access
Policy AL5: Thermal Efficiency
Policy AL6: Key Views
Policy AL7: Community Spaces and Landmarks
Policy AL8: Conservation of Key Habitats
Policy AL9: Dark Night Skies
Policy AL10: Important on Leisure Facilities
Policy AL11: Enhancement of Leisure Facilities
Policy AL12: Commercial Development
Policy AL13: Business in Residential Properties

10. The Ardington and Lockinge NDP is not seeking to allocate any sites for development; however, the NDP does seek to introduce a settlement boundary. We have therefore considered whether focusing new development within the village boundary (through infill), could result in the plan directing new development to sites that could potentially have significant effects on the landscape and historic environment including listed buildings and archaeological remains.
11. Careful consideration of the proposed boundary in relation to how the Vale of White Horse Local Plan 2031 guides the location and scale of development indicates that the proposed boundary merely adds detail and aids the interpretation of existing policies.
12. The Ardington and Lockinge NDP will contain a comprehensive range of policies to maintain the character, culture and heritage of the NDP area, as well as specifying design criteria for development.
13. Policies in the Ardington and Lockinge NDP aim to support sustainable development in the NDP area that will not adversely impact on its character. The plan does not allocate any sites for housing.
14. Overall, we note that the plan does not allocate any sites for development and places great emphasis on conserving the character and appearance of the area.
15. It is therefore concluded that the implementation of the Ardington and Lockinge NDP would not result in likely significant effects on the environment.

CONSULTATION RESPONSES

16. The screening opinion was sent to Historic England, The Environment Agency, Natural England and Oxfordshire County Council on 29 October 2025 for a four-week consultation period. The responses in full are presented in Appendix 4.
17. The Environment Agency did not provide comments on this SEA and HRA Screening.
18. Historic England confirmed their agreement, that the Ardington and Lockinge NDP does not need a SEA.
19. Natural England confirmed their agreement that there are unlikely to be significant environmental effects from the proposed plan and also agreed that the Ardington and Lockinge Neighbourhood Plan does not require further HRA assessment. They did not have any specific comments on the draft Neighbourhood Plan.
20. Oxfordshire County Council confirmed that they have no comments on the Ardington and Lockinge NDP SEA and HRA Screening Opinion.

CONCLUSION

21. As a result of the screening undertaken by the Council, the following determination has been reached.
22. The Ardington and Lockinge NDP is unlikely to have significant effects on Natura 2000 sites, therefore, an Appropriate Assessment for the Ardington and Lockinge Neighbourhood Development Plan is not required.
23. Based on the assessment presented in Appendices 1 & 3, the Ardington and Lockinge NDP is not likely to have a significant effect on the environment.
24. The Ardington and Lockinge NDP does not require a Strategic Environment Assessment.

Authorised by: Tim Oruye – Head of Policy and Programmes

Date: 5 December 2025

Appendix 1 – Extract from ‘A Practical Guide to the Strategic Environmental Assessment Directive’ (DCLG) (2005)

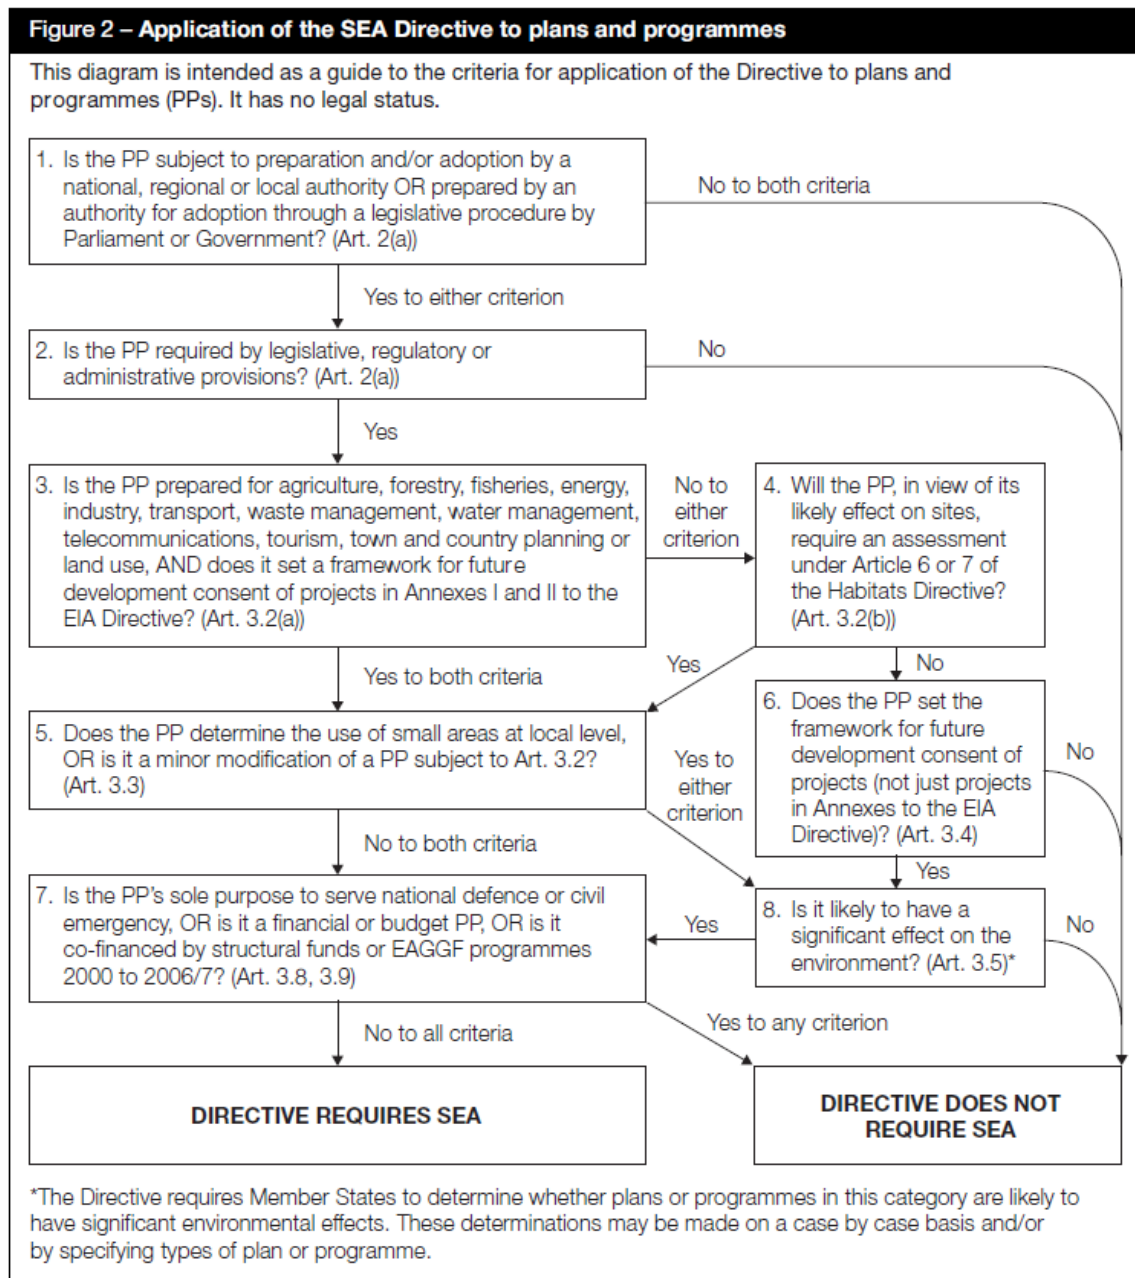

Table 1: Application of SEA Directive as shown in Appendix 1

Stage	Y/N	Explanation
<p>1. Is the Neighbourhood Plan subject to preparation and/or adoption by a national, regional or local authority OR prepared by an authority for adoption through a legislative procedure by Parliament or Government? (Art. 2(a))</p>	Y	<p>The preparation of and adoption of the Neighbourhood Development Plan is allowed under the Town and Country Planning Act 1990 as amended by the Localism Act 2011. The Neighbourhood Plan is being prepared by the Ardington and Lockinge NDP Steering Group, a working group who report to the Ardington and Lockinge Parish Council (as the “relevant body”) and will be “made” by Vale of White Horse District Council as the local authority. The preparation of Neighbourhood Plans is subject to the following regulations:</p> <ul style="list-style-type: none"> • The Neighbourhood Planning (General) Regulations 2012 • The Neighbourhood Planning (referendums) Regulations 2012 • The Neighbourhood Planning (General) (Amendment) Regulations 2015 • The Neighbourhood Planning (Referendums) (Amendment) Regulations 2016 • The Neighbourhood Planning (General) (Amendment) Regulations 2016 • The Neighbourhood Planning (General) (Amendment) Regulations 2017
<p>2. Is the NP required by legislative, regulatory or administrative provisions? (Art. 2(a))</p>	Y	<p>Whilst the Neighbourhood Development Plan is not a requirement and is optional under the provisions of the Town and Country Planning Act 1990 as amended by the Localism Act 2011, it will, if “made”, form part of the Development Plan for the District. It is therefore important that the screening process considers whether it is likely to have significant</p>

		<p>environmental effects and hence whether SEA is required under the Directive.</p> <p>National Planning Practice Guidance (Paragraph: 051 Reference ID: 41-051-20150209) sets out that draft neighbourhood plan proposals should be assessed to determine whether the plan is likely to have significant environmental effects. This assessment should be undertaken in accordance with the requirements set out in regulation 9 of the Environmental Assessment of Plans and Programmes Regulations 2004.</p>
3. Is the Neighbourhood Plan prepared for agriculture, forestry, fisheries, energy, industry, transport, waste management, water management, telecommunications, tourism, town and country planning or land use, AND does it set a framework for future development consent of projects in Annexes I and II (see Appendix 2) to the EIA Directive? (Art 3.2(a))	N	The Ardington and Lockinge NDP is prepared for town and country planning and land use and will not set out a framework for future development of projects that would require an EIA.
4. Will the Neighbourhood Plan, in view of its likely effect on sites, require an assessment for future development under Article 6 or 7 of the Habitats Directive? (Art. 3.2 (b))	N	The Ardington and Lockinge NDP is unlikely to have significant effects on Natura 2000 sites. See Habitat Regulations Assessment (HRA) Screening Opinion for the Ardington and Lockinge NDP in Appendix 2.
5. Does the Neighbourhood Plan determine the use of small areas at local level, OR is it a minor modification of a PP subject to Art. 3.2? (Art. 3.3)	Y	The Ardington and Lockinge NDP will determine the use of sites/small areas at a local level.
6. Does the Neighbourhood Plan set the framework for future development consent	Y	When made, the Ardington and Lockinge NDP will include a series of policies to guide development within the NDP area. This will inform the

of projects (not just projects in annexes to the EIA Directive)? (Art 3.4)		determination of planning applications providing a framework for future development consent of projects.
7. Is the Neighbourhood Plan's sole purpose to serve the national defence or civil emergency, OR is it a financial or budget PP, OR is it co-financed by structural funds or EAGGF programmes 2000 to 2006/7? (Art 3.8, 3.9)	N	N/A
8. Is it likely to have a significant effect on the environment? (Art. 3.5)	N	The plan is not likely to have significant effects on the environment. See assessment of the likely significance of effects on the environment in Appendix 3.

Appendix 2 - Habitat Regulations Assessment (HRA) Screening Opinion for the Ardington and Lockinge Neighbourhood Development Plan

INTRODUCTION

1. The Local Authority is the “competent authority” under the Conservation of Habitats and Species Regulations 2017, and needs to ensure that Neighbourhood Plans have been assessed through the Habitats Regulations process. This looks at the potential for significant impacts on nature conservation sites that are of European importance¹, also referred to as Natura 2000.
2. This Screening Assessment relates to a Neighbourhood Development Plan that will be in general conformity with the strategic policies within the development plan² (the higher level plan for town and country planning and land use). This Screening Assessment uses the Habitats Regulations Assessment of Vale of White Horse District Council’s Local Plan 2031 Part 2 (LPP2)³ as its basis for assessment. From this, the Local Authority will determine whether the Ardington and Lockinge Neighbourhood Development Plan is likely to result in significant impacts on Natura 2000 sites either alone or in combination with other plans and policies and, therefore, whether an ‘Appropriate Assessment’ is required. An updated HRA has been produced during the preparation of the emerging Joint Local Plan. Where relevant, findings from this report have been identified in the analysis of significant impacts.

LEGISLATIVE BASIS

3. Article 6(3) of the EU Habitats Directive provides that:

“Any plan or project not directly connected with or necessary to the management of the [European] site but likely to have a significant effect thereon, either individually or in combination with other plans or projects, shall be subject to appropriate assessment of its implications for the site in view of the site's conservation objectives. In the light of the conclusions of the assessment of the implications for the site and subject to the provisions of paragraph 4, the competent national authorities shall agree to the plan or project only after having ascertained that it will not adversely affect the integrity of the site concerned and, if appropriate, after having obtained the opinion of the general public.”

¹ Special Protection Areas (SPAs) for birds and Special Areas of Conservation (SACs) for other species, and for habitats.

² The South Oxfordshire Local Plan 2035 (December 2020)

³ Vale of White Horse LPP2 Habitats Regulations Assessment (February 2018 Update)

4. Regulations 105-106 of the Conservation of Habitats and Species Regulations 2017 state:

“105.—(1) Where a land use plan—

- (a) is likely to have a significant effect on a European site or a European offshore marine site (either alone or in combination with other plans or projects), and*
- (b) is not directly connected with or necessary to the management of the site,*
the plan-making authority for that plan must, before the plan is given effect, make an appropriate assessment of the implications for the site in view of that site’s conservation objectives.

(2) The plan-making authority must for the purposes of the assessment consult the appropriate nature conservation body and have regard to any representations made by that body within such reasonable time as the authority specifies.

(3) The plan-making authority must also, if it considers it appropriate, take the opinion of the general public, and if it does so, it must take such steps for that purpose as it considers appropriate.

(4) In the light of the conclusions of the assessment, and subject to regulation 107, the plan-making authority must give effect to the land use plan only after having ascertained that it will not adversely affect the integrity of the European site or the European offshore marine site (as the case may be).

(5) A plan-making authority must provide such information as the appropriate authority may reasonably require for the purposes of the discharge by the appropriate authority of its obligations under this Chapter.

(6) This regulation does not apply in relation to a site which is—

- (a) a European site by reason of regulation 8(1)(c), or*
- (b) a European offshore marine site by reason of regulation 18(c) of the Offshore Marine Conservation Regulations (site protected in accordance with Article 5(4) of the Habitats Directive).*

106.—(1) A qualifying body which submits a proposal for a neighbourhood development plan must provide such information as the competent authority may reasonably require for the purposes of the assessment under regulation 105 or to enable it to determine whether that assessment is required.

(2) In this regulation, “qualifying body” means a parish council, or an organisation or body designated as a neighbourhood forum, authorised

for the purposes of a neighbourhood development plan to act in relation to a neighbourhood area as a result of section 61F of the TCPA 1990 (authorisation to act in relation to neighbourhood areas)(159), as applied by section 38C of the 2004 Planning Act (supplementary provisions)(160).

(3) Where the competent authority decides to revoke or modify a neighbourhood development plan after it has been made, it must for that purpose make an appropriate assessment of the implications for any European site likely to be significantly affected in view of that site's conservation objectives; and regulation 105 and paragraph (1) apply with the appropriate modifications in relation to such a revocation or modification.

(4) This regulation applies in relation to England only."

EUROPEAN SITES

5. There are two European sites within Vale of White Horse District – Cothill Fen SAC and Hackpen Hill SAC. European sites also lie in adjoining districts and those with potential for longer range and indirect effects include, Little Wittenham SAC (South Oxfordshire) and River Lambourn SAC (West Berkshire). Ardington and Lockinge NDP has the following relationships with these areas:

- Cothill Fen SAC (Approx. 10.97km)
- Little Wittenham SAC (Approx. 13.2km)
- Hackpen Hill SAC (Approx. 7.5km)
- River Lambourn SAC (Approx 13.5km)

Cothill Fen SAC – Approximately 10.87km (Vale of White Horse District Council)

6. Cothill Fen is designated as a SAC for its calcium-rich, spring fed fens and alder woodlands on floodplains. Cothill Fen is an exceptionally important site with an outstanding range of nationally rare habitats which support a large number of rare invertebrates and plants. The habitats consist of calcareous fen, calcareous grassland, woodland and scrub of varying degrees of wetness. The habitat supports over 330 species of vascular plant and over 120 nationally scarce or rare 13 invertebrates, including the nationally rare Southern Damselfly (*Coenagrion mercuriale*).
7. The main pressures and threats to this site include the impact of water pollution and hydrological changes, as well as air pollution and the

impact of atmospheric nitrogen deposition upon the calcium-rich waterfed fens.

Little Wittenham SAC – approximately 13.2km (South Oxfordshire District Council)

8. One of the best-studied great crested newt sites in the UK, Little Wittenham comprises two main ponds set in a predominantly woodland context (broadleaved and conifer woodland is present). There are also areas of grassland, with sheep grazing and arable bordering the woodland to the south and west. The River Thames is just to the north of the site, and a hill fort to the south. Large numbers of great crested newts *Triturus cristatus* have been recorded in the two main ponds, and research has revealed that they range several hundred metres into the woodland blocks.
25. The main pressures and threats to this site include the impacts of public access and disturbance, and invasive fish species upon great crested newt.

Hackpen Hill SAC – approximately 7.5km (Vale of White Horse District Council)

9. Hackpen Hill has slopes with a wide variety of aspect and gradient. Most of the grassland is dominated by red fescue *Festuca rubra*, but this is replaced by upright brome *Bromus erectus* on some middle and lower slopes. The herb flora includes horseshoe vetch *Hippocrepis comosa*, common rockrose *Helianthemum nummularium*, dwarf thistle *Cirsium acaule*, autumn gentian *Gentianella amarella*, fragrant orchid *Gymnadenia conopsea* and frog orchid *Coeloglossum viride*. An enclosed, ungrazed strip on Hackpen Down contains hawthorns and elder scrub, interspersed with upright brome grassland and herbs including sainfoin *Onobrychis viciifolia* and basil thyme *Acinos arvensis*.
10. The key environmental conditions that support the features of European interest are appropriate management, minimal air pollution, and absence of direct fertilisation.

River Lambourn SAC – approximately 13.5km (West Berkshire Council)

11. The River Lambourn SAC is a site of approximately 27 hectares located wholly within West Berkshire and consists of the River Lambourn water body. The Lambourn supports Bullhead (*Cottus gobio*) populations inhabiting chalk streams in central southern England. Good water quality, coarse sediments and extensive beds of submerged plants provide an excellent habitat for the species. The presence of Brook lamprey (*Lampetra planeri*) is also a qualifying feature of the site.

12. The main pressures and threats to this site include the impacts of hydrological changes, pollution to groundwater and invasive non-native species.

ASSESSMENT

13. As required under Regulation 106 of the Conservation of Habitats and Species Regulations 2017 (the 'Habitats Regulations'), the qualifying body (Ardington and Lockinge Parish Council) provided the required information to enable Vale of White Horse District Council to determine whether the assessment under Regulation 105 is required. Consideration has been given to the potential for the development proposed by the Neighbourhood Plan to result in significant effects associated with:

- Atmospheric Pollution;
- Recreational Disturbance;
- Invasive non-native species and
- Water Quality and Quantity.

Atmospheric pollution;

14. Air pollution is most likely to affect European sites where plant, soil and water habitats are the qualifying feature, but some qualifying animal species may also be affected, either directly or indirectly, by any deterioration in habitat as a result of air pollution. Deposition of pollutants to the ground and vegetation can alter the characteristics of the soil, affecting the pH and nitrogen availability that can then affect plant health, productivity and species composition.
15. Based on the Highways Agency Design for Road and Bridges (DMRB) Manual Volume 11, Section 3, Part 120 (which was produced to provide advice regarding the design, assessment and operation of trunk roads (including motorways)), it is assumed that air pollution from roads is unlikely to be significant beyond 200m from the road itself.
16. The European site that is within 200m of a strategic road is Cothill Fen SAC (Honeybottom Lane and Besselsleigh Road).
17. Air quality is listed as a threat to Cothill Fen SAC. The Vale of White Horse HRA (2018) stated:

“The main routes for vehicular traffic will not be the country lanes around Cothill Fen but the major roads (e.g. A34) to the east that provide commuter links. There is an expectation that significant increases in vehicular movements within 200m of Cothill Fen SAC are unlikely, and it is therefore considered unlikely that any air quality impact on Cothill Fen will arise.”

18. The submission Joint Local Plan HRA (2024) is still awaiting additional work in regards to air quality before significant effects can be ruled out at Cothill Fen SAC and Oxford Meadows SAC. However, given that there are no allocations proposed in the Ardington and Lockinge Neighbourhood Plan, the NDP will not add in combination effects, therefore significant effects on the SACs in relation to air quality can be screened out and do not need to be considered further.

Recreation disturbance; and

19. The HRA of the Vale of White Horse Local Plan (June 2018) stated:

“Natural England’s Site Improvement Plans record the threats and pressures relevant to each European site. Public access or disturbance are not identified as current threats or pressures at the following sites, despite their lying close to large settlements: Aston Rowant SAC, Hartslock Wood SAC, Cothill Fen SAC, and Oxford Meadow SAC.”
20. It should be emphasised that many European sites are National Nature Reserves (e.g. Cothill Fen) or nature reserves managed by wildlife trusts or nature conservation charities, at which access is encouraged and resources are available to ensure that recreational use is managed appropriately
21. The JLP HRA Appropriate Assessment (Dec 2024) clarified that the Cothill Fen SAC is “not generally promoted for public access and is unlikely to attract visitors from a long distance. Development very close to the site could generate visitors (e.g. dog walkers from within c.1km away), but as the site is very wet, visitors naturally follow the boardwalk paths. The site is mainly considered to be sensitive to changes in groundwater or hydrology, not recreation.” As the closest part of the NDP area is approximately 10.9km from Cothill Fen SAC it is considered that recreational disturbance effects can be screened out.
22. Ardington and Lockinge is approximately 13.2km from Little Wittenham SAC, which is part of a larger site managed by the Earth Trust as a nature reserve. The Earth Trust restricts access to the most sensitive areas of the SAC by maintaining a signed network of paths and a pond viewing area, within the woodland. The areas which are most important to the population of great crested newts (GCN) have restricted access which is designed to prevent conflicts between the visiting public, the newts and their habitat.
26. The increased visitor levels are likely to be very modest due to the potential infill sites and redevelopment that could occur within the parish causing an increase in population and therefore any increased pressure on the habitats on the reserve as a whole is considered likely to be modest. However, due to restricted access to the areas where newts are primarily found, the increased visitor numbers will be

concentrated onto other habitats on the reserve. These habitats are not related to the primary reasons for the selection of the SAC.

23. Great crested newts are not believed to be particularly sensitive to human disturbance provided their breeding ponds are not affected and their primary terrestrial habitat and hibernacula are not adversely affected. Provided controls on access to the most sensitive areas are maintained (i.e. ponds and hibernacula are not disturbed) there is no reason to believe that there would be any significant effect on the integrity of the site or the primary reason for the selection of the site.
24. The JLP HRA (2024) states that the latest Natural England condition assessment of the great crested newt features (22/07/2010) still recorded 'favourable' status. Given the low sensitivity of the great crested newt population to recreational disturbance and the visitor management measures in place likely significant effects alone and in combination to the Little Wittenham SAC are screened out.

Water Quality and Quantity.

25. European sites at which aquatic or wetland environments support qualifying features have the potential to be affected by changes in water quantity or quality. New development can alter the quality of the water environment through direct contamination to those locations which are hydrologically connected to a development site but also through changes in the demand for wastewater treatment.
26. Water quantity also plays a critical role in the health and biodiversity of river catchments, including water levels (depth and volumetric flow) and velocity in the river, and water table levels in the floodplain. These properties in turn influence rates of siltation and erosion, dissolved oxygen, and pollutant and nutrient concentrations. Low flow rates affect food availability for riparian fauna, may limit migration and dispersal, and can alter the structure, composition and condition of vegetation communities. New homes require the development of new infrastructure, including the provision of fresh water supply. Increases in water demand can impact upon those locations where water is abstracted.
27. The European sites which identify a hydrological risk are:
 - Cothill Fen SAC: Cothill Fen SAC owes its existence to unusual hydrological conditions arising from changes in the underlying geology (Natural England, 2016b). The site has calcium-rich springwater fed fens which are sensitive to water pollution and hydrological changes (Natural England, 2014b). The 2018 HRA concluded that no adverse effects on the integrity of Cothill Fen SAC. The Council commissioned a Lowlands Fens study in 2024 (Morris et al.) to identify sites supporting this habitat types and to identify spatial risk zones

around each site where hydrological impacts of development in these zones could result in adverse effects to the site's fen habitat. The catchment stretches northwards from the SAC and given Ardington and Lockinge is at least 10.9km south of the SAC, it is considered that likely significant effects to the Cothill Fen SAC can be screened out.

- River Lambourn SAC: the sites are sensitive to hydrological changes and water quality. The River Lambourn is also affected by Natural England's 2022 advice on nutrient impacts on habitats sites. The 2018 HRA scoped out the River Lambourn SAC from the HRA as it was deemed that no actual pathway existed connecting it to development in Vale of White Horse. The 2024 JLP HRA considered impacts, but concluded likely significant effects to the River Lambourn SAC are screened out. Ardington and Lockinge is approx. 13.5km from the SAC and does not fall within the catchment and therefore, likely significant effects to the River Lambourn SAC are screened out.

In combination effects

28. The Council has considered the HRA of the Vale of White Horse Local Plan 2031 Part 2 (October 2019) in respect of the potential in combination effects of the proposals in the Ardington and Lockinge Neighbourhood Plan. The Plan does not allocate any sites for development or promote additional development beyond what is supported in the adopted Development Plan. None of the SACs are located within the Ardington and Lockinge NDP area and the closest is approximately 7.5km from the boundary of the NDP area. Therefore, the Ardington and Lockinge NDP is unlikely to have significant effects on Natura 2000, either alone or in combination with other plans or projects, taking the above into account.

CONCLUSION

29. The Ardington and Lockinge NDP is unlikely to have significant effects on Natura 2000 sites, either alone or in combination with other plans or projects, therefore, an Appropriate Assessment for the Ardington and Lockinge NDP is not required.

Appendix 3 - Assessment of the likely significance of effects on the environment

1. Characteristics of the Plan, having regard to:	
(a) the degree to which the plan or programme sets a framework for projects and other activities, either with regard to the location, nature, size and operating conditions or by allocating resources;	The Ardington and Lockinge NDP would, if adopted, form part of the Statutory Development Plan and as such does contribute to the framework for future development consent of projects. However, the Plan will sit within the wider framework set by the National Planning Policy Framework, and the strategic policies of the Vale of White Horse Local Plan 2031.
(b) the degree to which the plan or programme influences other plans and programmes including those in a hierarchy;	A Neighbourhood Development Plan must be in conformity with the Local Plan for the District. It does not influence other plans. The Ardington and Lockinge Neighbourhood Plan is unlikely to influence other Plans or Programmes within the statutory Development Plan.
(c) the relevance of the plan or programme for the integration of environmental considerations in particular with a view to promoting sustainable development;	National policy requires a presumption in favour of sustainable development, which should be seen as a golden thread through plan-making, including the Ardington and Lockinge NDP. Ardington and Lockinge has to ensure it meets a basic condition to contribute to the achievement of sustainable development. Within this wider context, the Ardington and Lockinge NDP itself is unlikely to have a significant positive or negative effect. The plan includes a focus on sustainable growth, there are policies aimed at development conserving and enhancing areas within and outside the built up areas. There is also a strong focus on protecting and promoting the heritage and cultural assets and feel of the area. This focus combined with the relevant policies will help to provide development which meets the needs of residents now and in the future.

<p>(d) environmental problems relevant to the plan or programme; and</p>	<p>The environmental impact of the proposals within the Ardington and Lockinge NDP is likely to be minimal as the plan does not allocate any sites for development or support additional development beyond what is supported in the Development Plan. Policies in the Ardington and Lockinge NDP will aim to support sustainable development in the NDP area. Retaining and improving the character, heritage and appearance of the area is particularly important.</p> <p>The Ardington and Lockinge NDP area contains the following environmental designations:</p> <ul style="list-style-type: none"> - Archaeological constraints - BAP priority habitats - National Landscapes - Conservation Areas - Flood Zones – Zone 2 and 3 - Listed building structures - Local Wildlife sites - Protected species buffer - Scheduled Ancient Monuments - Ancient Woodland <p>There are the following SACs within 17km of the Ardington and Lockinge NDP (the distances are measured from the edge of the neighbourhood area). These are as follows:</p> <ul style="list-style-type: none"> - Cothill Fen SAC (Approx. 10.9km) - Little Wittenham SAC (Approx. 13.2km) - Hackpen Hill SAC (Approx. 7.5km) - River Lambourn SAC (Approx. 13.5km) <p>There is also the following SSSI located within the following distance of the Ardington and Lockinge NDP area:</p> <p style="padding-left: 40px;">27. Hackpen, Warren & Gramp's SSSI (Approx 5km)</p> <p>Given the NDP is not allocating sites, the amount of potential infill sites within the parish and their relationship to the designations within the NDP area, the proposals in the plan are unlikely to harm</p>
--	--

	these designations. Therefore, the effects are not likely to be significant.
(e) the relevance of the plan or programme for the implementation of Community legislation on the environment (for example, plans and programmes linked to waste management or water protection).	Development through infill and redevelopment in the Ardington and Lockinge NDP has been judged not to have an impact on Community legislation.
2. Characteristics of the effects and of the area likely to be affected, having regard, in particular, to:	
(a) the probability, duration, frequency and reversibility of the effects;	<p>The Ardington and Lockinge NDP is likely to have modest but enduring positive environmental effects. The effects are not likely to be reversible, as they relate to development. However, the proposals are minor and will be of a local scale.</p> <p>The policies in the Neighbourhood Plan add detail to existing development plan policies offering protection to the natural environment, Conservation Areas and Listed Buildings to sustain and enhance their significance and setting. This will have positive cumulative benefits for the area. However given the scale of what is proposed the positive effect is not likely to be significant.</p> <p>The plan is also likely to have positive social effects through the provision of residential development through infill (as supported by the development plan as a whole) and the protection of local green spaces and biodiversity generally.</p>
(b) the cumulative nature of the effects;	It is intended that the positive social effects of providing infill and redevelopment will have positive cumulative benefits for the area.
(c) the transboundary nature of the effects;	The effects of the Plan are unlikely to have transboundary ⁴ impacts.
(d) the risks to human health or the environment (for example, due to accidents);	The policies in the plan are unlikely to present risks to human health or the environment.
(e) the magnitude and spatial extent of the effects	The Ardington and Lockinge NDP relates to the parish of Ardington and Lockinge. The

⁴ Transboundary effects are understood to be in other Member States.

<p>(geographical area and size of the population likely to be affected);</p>	<p>NDP is not allocating any sites for development, and therefore as it will not promote any development that is above and beyond what is already supported in the Development Plan, the potential for environmental effects is also likely to be small and localised.</p>
<p>(f) the value and vulnerability of the area likely to be affected due to: (i) special natural characteristics or cultural heritage; (ii) exceeded environmental quality standards or limit values; or (iii) intensive land-use; and</p>	<p>The Ardington and Lockinge NDP offers an opportunity to enhance the natural environment and the cultural heritage of the area through the proposals being considered.</p> <p>The main vulnerability of the area is the impact of householder and small scale developments on the character and appearance of the Conservation Area, listed buildings and archaeological sites. However, given that the plan aims to ensure development conserves and enhances the Conservation Area through detailed design policies, whilst actively seeking to improve the cultural and heritage offering through heritage trails and a focus on the sense of place, it is considered there would not be likely significant effects to the environment</p> <p>The HRA Screening Assessment in Appendix 2 concluded that the Ardington and Lockinge NDP is unlikely to have significant effects on Natura 2000 sites, either alone or in combination with other plans and projects; therefore, an Appropriate Assessment of the Ardington and Lockinge NDP is not required.</p> <p>Environmental quality standards or limit values are not considered likely to be significantly affected by the Ardington and Lockinge NDP.</p> <p>In light of the proposals in the Ardington and Lockinge NDP, the plan is also not likely to cause significant effects in relation to intensive land use.</p>

<p>(g) the effects on areas or landscapes which have a recognised national, Community or international protection status.</p>	<p>The Ardington NDP area is mostly covered by the North Wessex Downs National Landscape, which is recognised to contain a distinctive character, natural beauty and some of the finest landscapes in England. The North Wessex Downs Area of Outstanding Natural Beauty Management Plan 2019-2024 has been extended until November 2025 it identifies that in general strategic levels of new housing within the National Landscape should be avoided except in exceptional circumstances, in line with national policy. The review of the current North Wessex Downs Management Plan is under way with a view to publishing a revised Plan in late 2025. The NDP is not allocating any sites for development and there are not likely to be significant effects on the National Landscape.</p>

Dear Sir or Madam

Ardington and Lockinge Neighbourhood Plan SEA Screening Opinion

Thank you for inviting Historic England to comment on this consultation. As the Government's adviser on the historic environment Historic England is keen to ensure that the protection of the historic environment is fully taken into account at all stages and levels of the local planning process. For the purposes of this consultation, Historic England will confine its advice to the question, "Is it (the Neighbourhood Plan) likely to have a significant effect on the historic environment?". Our comments are based on the information supplied.

It is noted that the Neighbourhood Plan does not allocate sites for development.

Given the unlikely significant effects upon the historic environment/heritage assets, Historic England concurs with the Local Authority and hence considers that a Strategic Environmental Assessment will not be required.

Historic England strongly advises that the conservation and archaeological staff of the relevant local authorities are closely involved throughout the preparation of the plan and its assessment. They are best placed to advise on; local historic environment issues and priorities, including access to data held in the Historic Environment Record (HER), how the allocation, policy or proposal can be tailored to

minimise potential adverse impacts on the historic environment; the nature and design of any required mitigation measures; and opportunities for securing wider benefits for the future conservation and management of heritage assets.

We should like to stress that this opinion is based on the information provided by you with your correspondence. To avoid any doubt, this does not reflect our obligation to provide further advice on later stages of the NP process and, potentially, object to specific proposals which may subsequently arise (either as a result of this consultation or in later versions of the plan) where we consider that these would have an adverse effect upon the environment.

Please do contact me, via email if you have any queries.

Yours sincerely

Dear ██████████

Ardington & Lockinge Neighbourhood Plan - SEA/HRA Screening Opinion Consultation

Thank you for your consultation on the above dated and received by Natural England on 29 October 2025.

Natural England is a non-departmental public body. Our statutory purpose is to ensure that the natural environment is conserved, enhanced, and managed for the benefit of present and future generations, thereby contributing to sustainable development.

Screening Request: Strategic Environmental Assessment (SEA) and Habitats Regulations Assessment (HRA)

It is Natural England's advice, on the basis of the material supplied with the consultation, that:

- significant effects on statutorily designated nature conservation sites or landscapes are unlikely; and,
- significant effects on Habitats sites¹, either alone or in combination, are unlikely.

The proposed neighbourhood plan is unlikely to significantly affect any Site of Special Scientific Interest (SSSI), Marine Conservation Zone (MCZ), Special Areas of Conservation (SAC), Special Protection areas (SPA), Ramsar wetland or sites in the process of becoming SACs or SPAs ('candidate SACs', 'possible SACs', 'potential SPAs') or a Ramsar wetland. The plan area is unlikely to have a significant effect on a National Park, Area of Outstanding Natural Beauty or Heritage Coast, and is unlikely to impact upon the purposes for which these areas are designated or defined.

Guidance on the assessment of Neighbourhood Plans, in line with the Environmental Assessment of Plans and Programmes Regulations 2004 is contained within the [Planning Practice Guidance](#). This identifies three triggers that may require the production of an SEA:

- a neighbourhood plan allocates sites for development
- the neighbourhood area contains sensitive natural or heritage assets that may be affected by the proposals in the plan
- the neighbourhood plan may have significant environmental effects that have not already been considered and dealt with through a sustainability appraisal of the Local Plan.

Natural England does not hold information on the location of significant populations of protected

¹ Habitats sites are those referred to in the [National Planning Policy Framework](#) (Annex 2 - glossary) as "any site which would be included within the definition at regulation 8 of the Conservation of Habitats and Species Regulations 2017 for the purpose of those regulations, including candidate Special Areas of Conservation, Sites of Community Importance, Special Areas of Conservation, Special Protection Areas and any relevant Marine Sites".

species, so is unable to advise whether this plan is likely to affect protected species to such an extent as to require an SEA. Further information is included in Natural England's [standing advice](#) on protected species.

Furthermore, Natural England does not routinely maintain locally specific data on all environmental assets. The plan may have environmental impacts on priority species and/or habitats, local wildlife sites, soils and best and most versatile agricultural land, or on local landscape character that may be sufficient to warrant an SEA. Information on ancient woodland, ancient and veteran trees is set out in Natural England/Forestry Commission [standing advice](#).

We therefore recommend that advice is sought from your ecological, landscape and soils advisers, local record centre, recording society or wildlife body on the local soils, best and most versatile agricultural land, landscape, geodiversity and biodiversity receptors that may be affected by the plan before determining whether a SEA is necessary.

Natural England reserves the right to provide further advice on the environmental assessment of the plan. This includes any third party appeal against any screening decision you may make. If a SEA is required, Natural England must be consulted at the scoping and environmental report stages.

Please send any new consultations, or further information on this consultation to consultations@naturalengland.org.uk

Yours sincerely
